

VicStrip Double Square

PUBLIC SPACES / WORKSPACES

Description

The exclusive design of VicStrip Double becomes more versatile with a square version of the panel. Being shorter, this 59.5x59.5cm panel is even more flexible to cut and adjust to any setting, blending with other panels in different dispositions and combinations.

The new size makes it possible to combine VicStrip in different sizes, complete surfaces that may not match the original sizes of the panels, and mix the panels in different dispositions or with other square acoustic panels. Being an acoustic panel shorter in size, VicStrip Square is even more flexible to cut and adjust to any setting.

Features

- Lightweight, making it easy to transport, and apply, offering less expensive shipment
- Easy to cut and readjust, it can be glued to walls and ceilings
- Free of wood, metal nails and with joints almost invisible
