

VicBooth Office

by **V/COUSTIC**

The VicBooth Office is a complete sustainable ecosystem of phone booths, private spaces, and isolated meeting rooms for the future office.

The VicBooth Office system is flexible, future-proof, and can adapt to changes in the office environment. Vicoustic developed modular booths in different sizes, with a wide range of accessories that can be upgraded and split into smaller units.

Speech Level Reduction Measurements

According to the values obtained for the Speech Level Reduction parameter (DS,A) and the criteria provided by the international standard, it is possible to conclude that the VicBooth Office is a Class B enclosure, meaning that according to the referred standard it "produces acceptable speech privacy if the background noise level of the room is at least 35 dB LAeq". Therefore, it is possible to conclude that VicBooth Office can provide acceptable speech privacy in any of the modern office spaces.
